We are looking for experienced Business analysts with knowledge of Retail and Private Banking and Securities Handling to work on the development of new Investment Services.

Responsibilities

- Collaborate with the product owner and the assigned Squad.
- Perform impact analysis, detail business, regulatory, legal, process requirements.
- Refine solutions together with the Product Owner and develop their business case.
- Work closely with the development team and ensure all information is available.
- Participate in the relevant agile ceremonies.
- Regularly report on status at different levels in the Tribe.
- Lead the change activities (launch, go to market, IT release).
- Gather, understand and challenge the needs of a diverse set of external and internal stakeholders.

Qualifications

- At least 5 years of relevant experience
- Experience with (agile) project management
- Certification in Agile methodologies (recommended)
- Experience in business analysis and conversion of ideation into features
- Experience in leading workshops
- Experience in Investments (contracting, advice cycle, and/or transactional)
- Experience in Retail and Private Banking

Soft skills

- Analytical mind – conceptual thinking
- Negotiation and persuasion skills
- Structured approach
- Able to work independently
- Problem-solver
- Quality-minded and eye for detail
- Goal-oriented
- Open to change
- Team player

Languages

Dutch & French
Strong written and spoken communication skills in one language with a good understanding of the other.

English
Main language spoken in team. Strong written and spoken communication skills needed.
